

**DRAFT** Joint Meeting of the Northern Delta-Mendota Region Management Committee,  
Central Delta-Mendota Region Management Committee, and  
Central Delta-Mendota GSA

Thursday, February 23, 2023, 10:00 AM

SLDMWA Boardroom, 842 6<sup>th</sup> Street, Los Banos, CA

**Management Committee and Central GSA Members and Alternates Present**

**Northern Delta-Mendota Region Management Committee**

Anthea Hansen, Member – Del Puerto and Oak Flat Water Districts  
Vince Lucchesi, Member – Patterson Irrigation District  
Maria Encinas, Member – City of Patterson

**Central Delta-Mendota Region Management Committee**

Amy Montgomery\*, Member – Santa Nella County Water District  
Danny Wade\*, Member/Alternate – Fresno Slough Water District/Tranquillity Irrigation District  
Randy Miles\*, Member – Eagle Field Water District  
Wayne Western\*, Member – Panoche Water District  
Damian Aragona\*, Member – Widren Water District  
Steve Stadler\*, Alternate – San Luis Water District  
Augie Ramirez\*, Alternate – Fresno County

\*Indicates representative, alternate, or 2<sup>nd</sup> alternate of the Central Delta-Mendota GSA

**San Luis & Delta-Mendota Water Authority Representatives Present**

John Brodie  
Ray Tarka

**Others Present**

Andrew Garcia – Valley Water

**Others Present via Zoom**

Juan Cadena\*, Alternate – Mercy Springs Water District  
Chase Hurley\*, Alternate – Pacheco Water District  
Laurie Rouch\*, Alternate – Santa Nella County Water District  
Adriel Ramirez\*, Alternate – Merced County  
Adam Scheuber\*, Alternate – Del Puerto Water District  
Leslie Dumas – Woodard & Curran  
Anona Dutton – EKI Environment & Water, Inc.  
Meredith Durant – EKI Environment & Water, Inc.  
Lauren Layne – Baker Manock & Jensen (latter portion of meeting)  
Scott Petersen – SLDMWA (latter portion of meeting)  
Joe Hopkins – Provost & Pritchard

**1. Call to Order/Roll Call**

Amy Montgomery/Santa Nella County Water District called the meeting to order at 10:06 AM.

2. **Committees to Consider Corrections or Additions to the Agenda of Items, as authorized by Government Code Section 54950 et. seq.**

No corrections or additions were made to the agenda of items.

3. **Opportunity for Public Comment**

No public comment was provided.

4. **Committees to Review and Take Action on Consent Calendar, Montgomery/Brodie**

- i. **Budget-to-Actual Report (through December 2022)**
- ii. **Grant Reimbursement Summary Report**

Maria Encinas/City of Patterson provided the motion to approve the Consent Calendar for the Northern Region Management Committee and Anthea Hansen/Del Puerto Water District seconded. The Northern Region Management Committee voted by roll call; the motion was passed unanimously by those present. Steve Stadler/San Luis Water District provided the motion to approve the Consent Calendar for the Central Region Management Committee and Danny Wade/Fresno Slough Water District-Tranquillity Irrigation District seconded. The Central Region Management Committee voted by roll call; the motion was passed unanimously by those present.

5. **Central Delta-Mendota Region Management Committee to Consider Minutes for the January 26, 2023 Regular Meeting, Brodie**

Wayne Western/Panoche Water District provided the motion to approve the Meeting Minutes for the Central Region Management Committee and Steve Stadler seconded. The Central Region Management Committee voted by roll call; the motion was passed unanimously by those present.

6. **Northern Delta-Mendota Region Management Committee to Consider Minutes for the February 2, 2023 Special Meeting, Brodie**

Maria Encinas provided the motion to approve the Meeting Minutes for the Northern Region Management Committee and Vince Lucchesi/Patterson Irrigation District seconded. The Northern Region Management Committee voted by roll call; the motion was passed unanimously by those present.

7. **Committees to Consider Directing Northern and Central Delta-Mendota Representatives to the Coordination Committee to Approve Preparation and Transmittal of a Request for Proposals Pertaining to the SGMA Round 1 Implementation Grant(Component 8, Task 7 – Subsidence Monitoring), Brodie**

John Brodie summarized the Memorandum included in the meeting materials, noting that the grant-funded activity is required to utilize a competitive process for selection of consultants. Anthea Hansen provided the motion to approve this direction for the Northern Region Management Committee representative and Maria Encinas seconded. The Northern Region Management Committee voted by roll call; the motion was passed unanimously by those present. Steve Stadler provided the motion to approve this direction for the Central Region Management Committee representative and Augie Ramirez seconded. The Central Region Management Committee voted by roll call; the motion was passed unanimously by those present.

**8. Northern Delta-Mendota Management Committee to Consider Revision to FY2024 Budget Approved at February 2, 2023 Special Meeting, Brodie**

John Brodie summarized the memorandum included in the meeting materials, and noted that the \$100,000 set-aside was included in the FY2024 budget, but was included in the Contracts line, and was not listed as a separate line-item.

Anthea Hansen provided the motion for the Northern Region Management Committee to revert to the original budget approved by the SLDWMA Board and Vince Lucchesi seconded. The Northern Management Committee voted by roll call; the motion was passed unanimously by those present.

**9. GSP Group Representatives Report from Subbasin Coordination Committee Meeting on February 13, 2023, Hurley/Lucchesi**

- a) Proposed RFP for Component 1, Task 8 of SGMA Round 1 Implementation Grant - Interconnected Surface Water Monitoring
- b) Subsidence Monitoring Locations for SGMA Round 1 Implementation Grant - Component 8, Task 7

Vince Lucchesi reported that although Luhdorff & Scalmanini had submitted a sole-source proposal to perform initial activities for development of the interconnected surface water monitoring network for the Subbasin, the grant requires a competitive selection process. Several members of the Coordination Committee assisted John Brodie in developing a Request for Proposals, which has been issued. The goal is to receive proposals prior to the next Coordination Committee meeting.

The potential location of a future subsidence monitoring station in the northern portion of the Subbasin was discussed previously. Potential locations in Checks 6 and 8 near the Delta-Mendota Canal had been suggested. John Brodie was asked to consult with SLDMWA staff, who recommended Check 4 based upon access and availability of power. Subsequently, LSCE noted that the planned continuous GPS units are solar-powered and do not require access to electrical power. John noted that the Coordination Committee had recommended Checks 6-8 as potential locations, and recommendations from local representatives are requested.

**10. Committees to Discuss Work Plan and Schedule for Preparation of 2025 GSP Update and GSA Review of Revised Common Chapter, Brodie**

John Brodie reported on a recent meeting with the SGMA points of contact, DWR, and the State Water Board. DWR intends to issue final determinations on the Amended GSPs simultaneously at the end of March. Subbasin response to the January 2020 letters from DWR will be a consideration. The Subbasins will be evaluated by DWR in totality, and the individual GSPs are less significant. If DWR determines the Subbasin response and GSP is inadequate, the case will be referred to the State Board. The State Board must hold a public hearing, which will be preceded by a 90-day public notice and a 60-day notice to individual well owners. The State Board will require groundwater extraction data from all well owners, with monthly readings and annual reporting. The State Board will also assess fees for groundwater extraction. During the period prior to the State Board public hearing, the Subbasin could revise its GSP in effort for it to be considered adequate. A probationary period of one year is allowed for the Subbasin to achieve approval of the GSP. If needed, the State Board may develop an Alternate Plan to govern groundwater use within the Subbasin.

John Brodie encouraged the Committee members to provide feedback on the revised draft Common Chapter which was previously circulated for review. Comments or revisions are requested by February 28, 2023.

**11. Committees to Discuss Merced County Stakeholder Input Meeting on Possible Changes to the Groundwater Mining and Export Ordinance, Hurley/Brodie**

Chase Hurley reported on a meeting conducted in December 2022 by the Merced County Board of Supervisors to evaluate the County Ordinance adopted in 2015 in light of SGMA and creation of the GSAs. The meeting was well attended. The Supervisors are concerned about export of groundwater outside of the County, and the GSA representatives noted that groundwater management within the individual subbasins should be considered, especially because the County encompasses more than one subbasin. The County staff will discuss the input received to date, intend to schedule another meeting with GSA representatives.

**12. Committees to Discuss Potential Synergies with Other Ongoing Water Quality Monitoring Programs, Brodie**

John Brodie reminded the Committee that this topic had been discussed at the Coordination Committee meeting in December 2022, with a presentation from the San Joaquin River Drainage Authority. John is not aware of any subsequent communication or information exchange since December.

**13. Committees to Discuss 2022 GSP Implementation**

- a) 2022 GSP Implementation Activities Review, Dutton
- b) Three-Month Look-Ahead Schedule, Dutton
- c) WY 2022 Annual Report, Dumas
- d) Upcoming GSP Implementation Monitoring Activities, Dumas
- e) Review and Evaluation of Recent USBR Subsidence Monitoring Data, Brodie
- f) Stakeholder Outreach and Engagement, Dumas/Dutton

Anona Dutton/EKI reviewed the three-month look-ahead schedule and the GSP Implementation Commitment summary tables intended to assist the GSAs in keeping on track with the commitments included in the original and Amended GSP, as well as with implementation of the individual projects and collective management actions. Leslie Dumas/Woodard & Curran reported that preparation of the WY 2022 Annual Report is in progress, and that a draft Report should be available for review in early March. Leslie reminded the GSA representatives that the Spring water level monitoring period has started. John noted that it will be interesting to compare the forthcoming USBR land-survey data with the DWR InSAR data. Leslie also reminded the GSAs to document their stakeholder outreach and engagement activities, for inclusion in the Annual Report.

**14. Committees to Discuss Potential Additional Funding Opportunities, Brodie**

John Brodie noted the additional grant funding opportunities included in the meeting materials.

15. **Next Steps**

The following next steps were identified during the meeting:

- John Brodie will re-transmit the red-line version of the revised GSP Common Chapter.
- John Brodie will attempt to re-schedule future meetings of the Northern and Central Region Delta-Mendota Management Committees to reduce potential conflicts with the GSA meetings in other Subbasins.
- John Brodie will distribute an updated list of the members and designated alternates for the Northern and Central Region Management Committees.

16. **Reports Pursuant to Government Code Section 54954.2(a)(3)**

No topics were discussed under this item.

17. **Future Meetings**

- a. Northern & Central Regions Management Committees
  - i. Tuesday March 21, 2023 at 10:00 AM
  - ii. Thursday April 27, 2023 at 10:00 AM (May be rescheduled)
  - iii. Thursday May 25, 2023 at 10:00 AM (May be rescheduled)
- b. Delta-Mendota Subbasin Coordination Committee
  - i. Tuesday March 21, 2023 at 1:00 PM

18. **ADJOURNMENT**

Amy Montgomery adjourned the meeting at 11:01 AM.

Special Joint Meeting of the Northern Delta-Mendota Region Management Committee,  
Central Delta-Mendota Region Management Committee, Central Delta-Mendota GSA, and  
Delta-Mendota Subbasin Coordination Committee

Monday, March 13, 2023, 1:30 PM **DRAFT**

SLDMWA Boardroom, 842 6<sup>th</sup> Street, Los Banos, CA

**Coordination Committee Members and Alternates Present**

Augie Ramirez – Fresno County  
Joe Hopkins – Provost & Pritchard/Aliso Water District  
Daniel Hartwig – Aliso Water District  
Chase Hurley – Pacheco Water District/Central Delta-Mendota Region  
Jarrett Martin – Central California Irrigation District/SJREC  
Jim Stilwell – Farmers Water District  
Will Halligan – Luhdorff & Scalmanini/Famers Water District  
Ken Swanson – Grassland Water District  
John Wiersma – San Luis Canal Company/SJREC  
Vince Lucchesi – Patterson Irrigation District/Northern Delta-Mendota Region

**Northern & Central Delta-Mendota Regions Management Committees Members and Alternates Present**

Anthea Hansen – Del Puerto Water District/Oak Flat Water District  
Bobby Pierce – West Stanislaus Irrigation District  
Aaron Barcellos – Pacheo Water District  
Danny Wade – Tranquillity Irrigation District/Fresno Slough Water District  
Juan Cadena – Mercy Springs Water District\*  
Maria Encinas – City of Patterson  
Randall Miles – Eagle Field Water District  
Wayne Western – Panoche Water District  
Damian Aragona – Widren Water District  
Lacey McBride – Merced County  
Steve Stadler – San Luis Water District  
Christy McKinnon – Stanislaus County

**San Luis & Delta-Mendota Water Authority Staff Present**

John Brodie  
Scott Petersen

**Others Present**

Jessica Johnson – Baker Manock & Jensen  
Anona Dutton – EKI Environment & Water, Inc.  
Meredith Durant – EKI Environment & Water, Inc.  
Ethan Andrews – Provost & Pritchard  
Rebecca Padilla – Stanislaus County

**1. Call to Order/Roll Call**

John Wiersma/SLCC called the meeting to order at 1:30 PM.

**2. Opportunity for Public Comment**

No public comment was shared under this meeting agenda item.

**3. Committees to Review Leadership Meeting to Discuss Next Steps, Barcellos/Hopkins**

Joe Hopkins/Aliso Water District reported that leadership from the Northern and Central and Coordination Committees met following receipt of the Inadequate Determination letter. The chairs and co-chairs attending the meeting received an overview of the Determination Letter, discussed possible next steps, and requested this Special Meeting be scheduled as soon as possible for all Committee members.

**4. Committees to Receive Overview of Inadequate Determination and Deficiencies, Brodie**

John Brodie/SLDWMA referred to a process flow chart included in the meeting materials. The Water Board must provide cities and counties with a minimum of 90-day notice in advance of a scheduled probationary hearing. Well owners must be provided with a minimum of 60-day notice for the same. Based upon his conversations with Water Board staff, John expects the Water Board to issue this advance notice within the next month. The Water Board may modify the list of GSP deficiencies identified by DWR. The Water Board suggested that representatives from the Subbasin meet with Water Board and DWR staff, and John Brodie has initiated scheduling of that meeting.

Chase Hurley/Pacheco WD reported that representatives from the Chowchilla Subbasin conducted an initial meeting via Zoom with staff from the Water Board and DWR to discuss their Inadequate Determination letter. At this time, the Water Board staff are starting from a point of no prior involvement in the GSPs, and they will rely on DWR staff findings. Cultural differences between the two agencies were recognized, with DWR more focused on water supply, and the Water Board more focused on water quality and drinking water. The Committees agreed to request that an ad hoc team including Jarrett Martin/CCID, Chase Hurley, and Scott Petersen participate in a meeting with the Water Board via Zoom to discuss next steps and anticipated schedule for the Delta-Mendota Subbasin.

**5. Committees to Discuss Subbasin GSPs, Brodie**

John Brodie noted that the Delta-Mendota Subbasin is complex, and that the six GSPs were prepared by several consultants. Only one subbasin with multiple GSPs and previously determined to be inadequate by DWR, was recently approved by DWR. The Kings Subbasin employed an approach where different consultants drafted chapters for multiple GSPs addressing a single subject (such as the water budget, or water quality). Thus, the Kings Subbasin GSPs were more organizationally consistent, and it was easier for DWR to understand the past and anticipated future coordination. Will Halligan reminded the Committees that use of SGMA Round 1 grant funds for GSP revision will involve solicitation of competitive proposals. Anona Dutton/EKI opined that it will be difficult for the Delta-Mendota Subbasin to avoid a probationary period, but with effort, focus, and increased coordination it may be possible to avoid the Water Board issuing an Interim Plan. The group discussed likely timing for the Water Board to issue its 90-day notice of a public hearing, as well as the potential schedule for the Water Board's imposition of groundwater extraction fees.

The Committees discussed the need for greater consistency in structure between the six GSPs, and the need for a subbasin-wide water budget with consistent individual water budgets to support it. The need for updating and revision of the Coordination Agreement was recognized.

**6. Northern and Central Committees to Authorize Its Representatives to the Coordination Committee to Approve Modifying Legal Counsel’s Scope of Work to Include Amending the Delta-Mendota Subbasin Coordination Agreement, Brodie**

Bobby Pierce/WSID provided the motion to approve this authorization for the Northern Region Management Committee representative and Vince Lucchesi/PIID seconded. The motion was passed unanimously by those present. Danny Wade/Fresno Slough WD provided the motion to approve this authorization for the Central Region Management Committee representative and Chase Hurley seconded. The motion was passed unanimously by those present.

**7. Northern and Central Committees to Authorize Its Representatives to the Coordination Committee to Modify the Existing Agreement with EKI to Address the Inadequate Determination for the Subbasin’s GSPs, Brodie**

Vince Lucchesi provided the motion to approve this authorization for the Northern Region Management Committee representative and Bobby Pierce seconded. The Northern Region Management Committee voted by roll call; the motion was passed unanimously by those present. Danny Wade provided the motion to approve this authorization for the Central Region Management Committee representative and Steve Stadler/San Luis Water District seconded. The motion was passed unanimously by those present.

**8. Coordination Committee to Consider Modifying Legal Counsel’s Scope of Work to Include Amending the Delta-Mendota Subbasin Coordination Agreement, Brodie**

The Committee discussed the need to update and amend the Subbasin Coordination Agreement and the need for legal counsel input in this process. Vince Lucchesi provided the motion to modify the scope of work for the Subbasin’s legal counsel to include revision of the Subbasin Coordination Agreement and Jarrett Martin seconded. The motion was passed unanimously by those present.

**9. Coordination Committee to Consider Modifying the Existing Agreement with EKI to Address the Inadequate Determination for the Subbasin’s GSPs, Brodie**

Jarrett Martin provided the motion for EKI to proceed with developing a common GSP outline, a subbasin water budget, revised sustainable management criteria, and a term sheet using FY2024 budget previously approved by the Coordination Committee and Vince Lucchesi seconded. The motion was passed unanimously by those present. It was noted that SGMA Round 1 implementation grant funds cannot be used for this purpose. SLDMWA staff will review EKI’s progress and budget status over the next 45 to 60 days and report back to the Committees. Future authorization of additional budget for EKI to complete these initial GSP revision tasks is anticipated.

10. **Conference with Legal Counsel – Anticipated Litigation**

The Committee met in closed session to confer with legal counsel on significant exposure to anticipated litigation pursuant to Paragraph (2) of Subdivision (d) of Government Code Section 54956.9 (1 case).

11. **Conference with Legal Counsel – Existing Litigation**

The Committee met in closed session to confer with legal counsel pursuant to Paragraph (1) of Subdivision (d) of Government Code Section 54956.9.

*California Sportfishing Protection Alliance v. All Persons Interested in the Matter of the Validity of the Northern and Central Delta-Mendota Regions Groundwater Sustainability Plan, et al.*, Merced County Superior Court, Case No. 21CV-01691.

12. **Report out of Closed Session**

There were no actions identified during the Closed Session discussion.

13. **Next Steps**

- Staff will amend the task order for EKI to include the current budget allocation to respond to the inadequate determination for the Subbasin GSPs.
- EKI will initiate preparation of a common GSP outline, subbasin water budget, and revised sustainable management criteria.
- Staff will schedule a meeting between Water Board staff and the ad hoc subcommittee to discuss the Subbasin's response to the inadequate determination from DWR.
- Staff will inquire whether SWRCB can delay issuing the public hearing notices due to the active flood emergency in the subbasin.
- Scott will work with elected representatives to educate them about the difficulties of simultaneously managing SGMA and flooding issues.

14. **Reports Pursuant to Government Code 54954.2(a)(3)**

No topics were discussed under this item.

15. **Future Meetings**

- a. March 21, 2023 10:00AM: Special Joint Northern & Central Delta-Mendota Management Committees Meeting and Central GSA Meeting
- b. March 21, 2023 1:00PM: Special Meeting of the Delta-Mendota Subbasin Coordination Committee

16. **ADJOURNMENT**

John Wiersma adjourned the meeting at 3:53 PM.

**SAN LUIS & DELTA-MENDOTA WATER AUTHORITY**  
**MARCH 1, 2022 - FEBRUARY 28, 2023**  
**SUSTAINABLE GROUNDWATER MANAGEMENT ACT SERVICES AGREEMENT**  
**ACTIVITY AGREEMENTS BUDGET TO ACTUAL**  
**NORTHERN DELTA-MENDOTA REGION (FUND 64)**

## MEMORANDUM

TO: Northern & Central Region Management Committee and Central GSA Members and Alternates

FROM: John Brodie, Water Resources Program Manager

DATE: March 20, 2023

RE: Approval of Transmitting a Request for Proposals for Work on SGMA Round 1 Grant Monitoring Networks (Component 8, Task 1)

---

### BACKGROUND

On October 11, 2022, the Del Puerto Water District (DPWD) signed a grant agreement with the California Department of Water Resources (DWR) to fund SGMA Implementation activities in the Delta-Mendota Subbasin. The grant agreement contains a total of 11 Components to be completed. Component 8 proposes to fill data and monitoring gaps identified by the Subbasin. Total funding allocated in the grant for a non-specific Interconnected Surface Water Monitoring Network (ISWMN) and a non-specific Subsidence Monitoring Network (SMN) is \$640,000.

### ISSUES FOR DECISION

The Coordination Committee, at its meeting on February 13, 2023 authorized a Request for Proposals (RFP) be issued to provide for the design of an ISWMN in the Delta-Mendota Subbasin. The RFP was released on February 16, 2023 to a list of consultants used by GSP groups in the Subbasin and others. One proposal was returned by the published deadline.

### RECOMMENDATION

Staff recommends the following:

That the Committees approve its representatives to the Coordination Committee to vote for the proposal submitted by Luhdorff & Scalmanini Consulting Engineers for the design of an Interconnected Surface Water Monitoring Network to meet the requirements of the SGMA Implementation Grant.

**ANALYSIS**

The proposal received meets all requirements as stipulated in the released Request for Proposals.

**BUDGET**

As previously noted, the total amount of funding available for Subbasin-wide benefit for ISW and subsidence monitoring is \$640,000. The submitted budget to complete the design of the Interconnected Surface Water Monitoring Network is \$25,250.

LSCE Proposal No. 23-2-002

## Design of an Interconnected Surface Water Monitoring Network for the Delta-Mendota Subbasin

**Luhdorff &  
Scalmanini**  
Consulting Engineers

Delta-Mendota Subbasin Coordination Committee

MARCH 10, 2023

March 10, 2023

LSCE No. 23-2-002

John Brodie  
Delta-Mendota Subbasin Coordination Committee  
842 6th Street  
Los Banos, CA 93635

**SUBJECT: Response to Request for Proposal for Design of an Interconnected Surface Water Monitoring Network for the Delta-Mendota Subbasin**

Dear Coordination Committee Members,

Luhdorff & Scalmanini, Consulting Engineers (LSCE) is excited to present our qualifications and proposal to provide the Delta-Mendota Subbasin Coordination Committee with engineering design services related to the Interconnected Surface Water (ISW) Monitoring Network. Based on our understanding of the project after reviewing the Coordination Committee's Request for Proposal (RFP), the work to be completed includes determining locations for nested monitoring wells, acquiring access agreements and/or easements as needed, providing design specifications for the individual monitoring well sites along with a basis for design report (required by the grant funding agreement), and coordination with adjacent subbasins.

LSCE has been a leader in Sustainable Groundwater Management Act (SGMA)-related work from the start. This includes our service on technical advisory groups to the California Department of Water Resources (DWR) during the development of the Groundwater Sustainability Plan (GSP) emergency regulations and Best Management Practices for implementation of the Act. Since then, we have assisted entities in groundwater basins and subbasins throughout California and the San Joaquin Valley to secure funding and fulfill SGMA requirements, including monitoring networks design. Our technical work related to GSPs spans many of the high- and medium- priority basins or subbasins representing diverse stakeholders.

Our team consists of individuals who have been involved with the Delta-Mendota GSP from the beginning, has worked on many projects along the San Joaquin River and has a very strong understanding of the shallow aquifer system throughout the region. LSCE has already conducted a significant amount of work related to the design of ISW monitoring networks for the Delta-Mendota Subbasin (Subbasin) GSPs and others. We are familiar with existing monitoring programs in the area and where the data gaps exist along the San Joaquin River. In the revised 2022 GSP for the Subbasin, it was decided by the Coordination Committee to use groundwater levels as a proxy for ISW due to the abundance of data gaps. Prior to the decision, LSCE was involved with the preliminary design of an ISW network in the Subbasin. Utilizing data already collected and analyzed for ISWs in the Subbasin and our experience on other projects in the region, LSCE is in an ideal position to design the Subbasin ISW network.

LSCE staff are currently working with the Chowchilla Subbasin to better characterize groundwater-surface water (GW-SW) interaction. The purpose of this work is to better understand how hydrogeologic conditions vary on different sides of the river and the relationship between shallow groundwater levels, streamflow fluctuations, and groundwater pumping.

Monitoring and developing sustainable management criteria (SMC) for ISWs is one of the more challenging issues given that surface water bodies often serve as the boundary between Groundwater Sustainability Agencies (GSAs) and GSP groups, making coordination extremely important. LSCE's involvement in multiple subbasins provides an excellent opportunity to promote inter-basin coordination and to assist in the development of SMCs that will help the region achieve sustainability as a whole. We have reviewed our current projected obligations and determined that we have the resources to devote to this project to complete it in a timely and cost-effective manner. We look forward to the opportunity to continue working with the Subbasin. Please feel free to contact our proposed project manager, Will Halligan at (530) 661-0109 or [whalligan@lsce.com](mailto:whalligan@lsce.com), should you have any additional questions about our proposal or proposed team.

Sincerely,

Luhdorff & Scalmanini, Consulting Engineers

Will Halligan  
Senior Principal Hydrogeologist  
President

Section 1.

## General Information

Luhdorff and Scalmanini, Consulting Engineers (LSCE) is a consulting and services organization providing hydrogeologic and civil engineering services related to the investigation, development, use, protection, and management of groundwater to public and private entities.

LSCE was founded in 1980 to fill a recognized need for technical and management expertise in a broad range of issues associated with groundwater resource development and its efficient utilization.

LSCE’s staff includes experts in hydrogeologic investigations, monitoring and production well design, site characterization, well construction and testing, well rehabilitation, water resources management, permitting, groundwater modeling, pump selection and pump station design, geographic information systems (GIS), database design, and AutoCAD (ACAD) drafting.

LSCE’s multi-disciplinary team of hydrogeologists, geologists and engineers have a wide range of expertise in groundwater resources and municipal water production facilities.

LSCE provides a wide range of consulting services related to groundwater management but over the past six years, much of our work has focused on the development and implementation of Groundwater Sustainability Plans (GSPs). This has included designing groundwater monitoring networks for the purpose of filling data gaps for each of the six groundwater sustainability indicators including interconnected surface waters.

Our integrated approach uses expertise in groundwater, hydrogeology, well structures and pumping stations to identify underlying issues and develop sensible solutions to address issues associated with changes in quantity, quality and efficiency of existing well facilities.

Sample projects with a scope similar to the project outlined in the RFP are provided on the following page. We encourage you to contact our clients to hear firsthand how we have implemented projects within budget under stringent deadlines.

Section 2.

## Experience

### Hydrogeologic Support Services

#### NAPA COUNTY

**CONTACT:** Ms. Jamison Crosby, Natural Resources Conservation Manager; **ADDRESS:** 1195 3rd St, Ste 210, Napa, CA, 94559; **PHONE:** 707.253.4823; **EMAIL:** jamison.crosby@countyofnapa.org; **TEAM:** Andrew Francis; **DATES:** 2017-ongoing

LSCE has been working for Napa County since 2008. LSCE provided groundwater expertise and technical services to Napa County to support General Plan development, Groundwater Sustainability Plan development, data management system and monitoring, ongoing monitoring network refinements, outreach and education, grant funding application submittal, and other hydrogeologic services. Monitoring network refinements included evaluation of groundwater conditions and data gaps; prepare updated plan for groundwater monitoring; planned and installed shallow, dual nested monitoring wells at five sites (10 total wells) for analysis and characterization of groundwater-surface water interactions (DWR local groundwater assistance grant). Four additional sites (8 monitoring wells) underway (support from Prop 68); ongoing County wide groundwater monitoring network planning, development, and tracking. LSCE has also served as a reviewer for Water Availability Assessments (WAA) for new well permits. The purpose of a WAA is to determine if additional groundwater pumping would create overdraft, injure neighboring well owners, or deplete interconnected-surface waters.

#### Project Outcome

An expanded monitoring network to fill data gaps and facilitate ongoing groundwater management activities including GSP implementation.

### Deer Creek Hydrogeological Analysis

#### TROUT UNLIMITED

**CONTACT:** Mr. Matt Clifford, Staff Attorney; **ADDRESS:** 5950 Doyle Street, Suite 2, Emeryville, CA 94608; **PHONE:** 408.370.9431; **EMAIL:** Matt.Clifford@tu.org; **TEAM:** Eddy Teasdale; **DATES:** 2018-2022

Deer Creek provides habitat for wild spring-run Chinook salmon, fall-run Chinook salmon, and Central Valley steelhead trout. The interaction of agricultural practices, including surface water diversions, groundwater extractions, and deep percolation of applied water, are poorly understood in the area. The purpose of this project was to assess the effects of eliminating Deer Creek surface water diversion to restore full upstream and downstream passage for salmonids. LSCE collected existing information, evaluated existing models, developed a local project model for this analysis, and assisted with project communications and outreach. The model allowed for exploration of conjunctive use management scenarios to maximize benefits for ecological flows within Deer Creek as well as irrigators. The model simulated the surface water system, the underlying groundwater system, and the interactions between the two.

#### Project Outcome

Determination of the net water available for dedication to instream flows after accounting for return flows currently returned to Deer Creek or other streams, historic diversion uses, and any increase in stream leakage (and/or reduced groundwater discharge) induced by potential lowering of groundwater levels provided the necessary context to balance environmental and other water uses.

## Hydrogeological On-Call Support Services

### TURNER ISLAND WATER DISTRICT

**CONTACT:** Mr. Larry Harris; **ADDRESS:** 1269 West I Street, Los Banos, CA; **PHONE:** 559.285.5940; **EMAIL:** LHarris@murdoc.com; **TEAM:** Eddy Teasdale; **DATES:** 2015-2022

LSCE has been providing hydrogeological technical support services for Turner Island Water District (TIWD), that covers a portion of the Merced and Delta-Mendota Subbasins. LSCE supported aquifer testing, SGMA assistance/peer-reviewed GSP chapters, developed TIWD water budgets, and seepage analysis. Developed water resources data management system using available data, identified data gaps, and provided recommendations for water resources monitoring. LSCE also reviewed updated hydrogeologic conceptualization and characterization of conditions including eight geologic cross-sections, refined and further characterized areas of greater recharge potential, and analyzed potential GW-SW interactions utilizing the existing monitoring network.

#### Project Outcome

The modeling and analysis provided the TIWD with the data necessary to make informed decisions related to groundwater recharge and other groundwater management activities.

### Additional Experience Summary

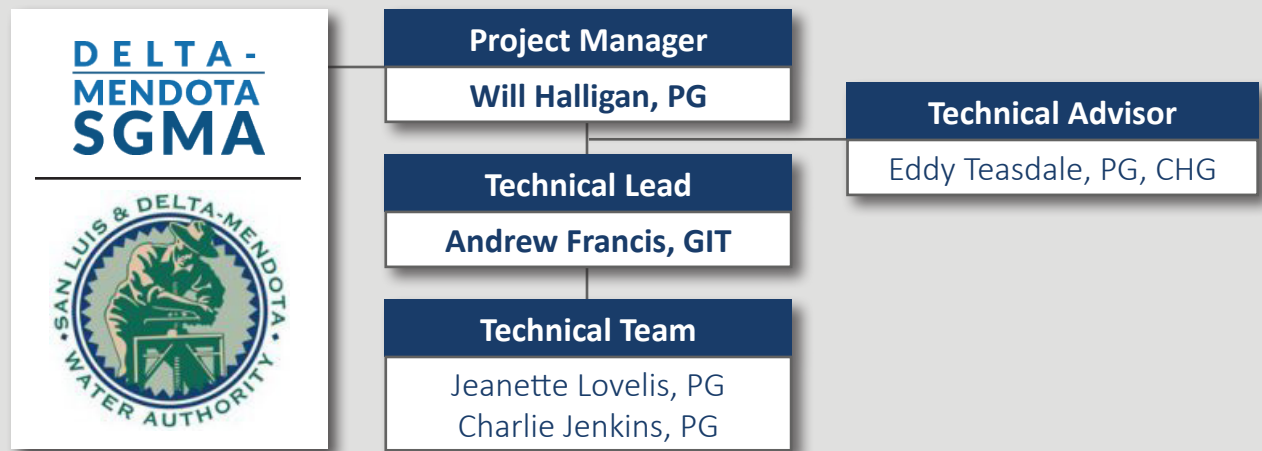

Project, Client	GW-SW Interaction	Monitoring Network Design	Subbasin Coordination

Section 3.

# Project Team

In selecting our team, we started by carefully evaluating the required functions and examined the likely critical issues and concerns. We then identified the associated disciplines necessary to complete the project and chose the most appropriate staff in each discipline. As a result, we have presented in the organizational chart below a highly qualified, experienced, streamlined group of professionals. Resumes for key team members are included in **Appendix A**.

## Organizational Chart

## KEY STAFF

**Will Halligan, PG**

**PROJECT MANAGER**

Developed groundwater management programs and developed/managed monitoring programs, on

local and regional scales, for over 25 years at LSCE. Developed and peer reviewed complex transient groundwater flow and solute transport models, evaluated and assessed geologic and hydrologic conditions for groundwater resource management, conducted CEQA/NEPA impact analysis, and investigated and identified overdraft conditions. Currently manages groundwater investigations projects including groundwater resource and conjunctive use programs and groundwater sustainability plan recharge projects.

**Andrew Francis, GIT**

**TECHNICAL LEAD**

Six years of professional experience in groundwater consulting in California, Idaho, Oregon, and Utah. Expertise is

in hydrogeological conceptualization, related to GSP development and implementation in multiple subbasins including characterizing interconnected GW-SW and developing including consideration of all sustainability indicators (e.g., water levels, subsidence, water quality). Experience on multiple projects providing well design and construction oversight. Well versed in GIS including geospatial analysis, mapping, and managing large geospatial datasets.

**Eddy Teasdale, PG, CHG**

**TECHNICAL ADVISOR**

Over 24 years of geological and hydrogeological investigations experience including complex,

comprehensive geology, hydrogeology, conveyance, flood control, and environmental issues. Extensive experience writing technical reports and working with local, state, and federal regulatory agencies including presenting project information and resolving project issues. His primary areas of technical expertise are in hydrogeologic characterization and groundwater modeling.

**SUPPORT STAFF**

**Charlie Jenkins, PG:** Thirteen years of experience in geology and hydrogeology conducting subsurface investigations for hydrogeologic characterization, permitting, construction management, interpretation of geophysical surveys, grain size distribution analysis, project specification preparation, contractor compliance, well construction and testing oversight, water quality sample collection oversight, and preparation of technical reports involving data evaluation and interpretation.

**Jeanette Lovelis, PG:** Thirteen years of geology, hydrogeology, water resource, GIS, and database management experience including: monitoring reporting and compliance, technical reports, hydrogeologic investigations, data management, well design, construction oversight, well testing, and project permitting. She has designed, built, and maintained relational and GIS databases with well information and related, surface water, land use, and geology data.

Section 4.

# Project Approach and Scope of Work

## APPROACH

LSCE’s approach to the proposed project has been developed based on the services specifically outlined in the RFP, our experience in the Subbasin and with projects of similar size and complexity, and our current understanding of this project.

The design of the ISW monitoring network described in the Scope of Work below will consist of existing monitoring wells, steam gages, and the addition of up to five nested and paired monitoring wells along the San Joaquin River. The purpose of this network will be to understand the response of shallow groundwater and surface water with deeper groundwater production. This network will be designed in a coordinated fashion with adjacent subbasins. The Scope of Work on the following page describes each of the key tasks necessary to perform this proposed Scope of Work. The budget for this work is influenced by documentation requirements for the implementation grant.

LSCE will utilize its extensive experience to critically review all aspects of the project to identify the unique challenges and issues that will need to be addressed in order to successfully and efficiently complete the project at the lowest cost and on schedule. From the first day of the project, and continuing throughout, LSCE’s highly experienced team will work together with the Coordination Committee (CC) and stakeholders to ensure a smooth and successful project all the way through to completion.

There are several key priorities to be addressed to successfully complete the proposed project. LSCE’s approach to addressing these priorities are shown in the following table.

LSCE's Approach to Key Priorities		
Key Priority	Potential Risk Factors	Mitigation Approach
Fill data gaps identified within the Subbasin	Landowner/stakeholder responsiveness	Start communication process immediately to provide the best chance of success. Leverage existing relationships with Subbasin GSAs.
	Inability to acquire access agreements in data gap areas.	Prioritize landowner outreach in areas most critical to achieving sustainability
	Inaccessibility of suitable sites for monitoring well adjacent to existing stream gauges	Recommend installation of a new stream gauge adjacent to monitoring well if needed
Meet grant requirements for the design of an ISW Monitoring Network	Lack of familiarity with grant requirements could cause delays	Experience developing and implementing DWR SGMA implementation grants allows us to avoid mistakes
Complete project on schedule	Meeting the expedited schedule	Subbasin and grant development experience allows us to start immediately with a minimal learning curve.
Complete project within grant budget	Additional required coordination/meetings may impact budget	Share preliminary plans with stakeholders prior to individual meetings to minimize risk through transparency.

## SCOPE OF WORK

### Task 1. Coordinate with Adjacent Subbasins on Existing Monitoring Sites

Luhdorff and Scalmanini, Consulting Engineers (LSCE) will review existing Groundwater Sustainability Plans (GSPs) and conduct outreach to the Modesto, Turlock, Merced, and Chowchilla subbasins to identify existing and planned interconnected surface water (ISW) monitoring locations. The goal of this task is to coordinate with the adjacent subbasins to promote future data sharing,

modifying sustainable management criteria (if necessary), and meeting sustainability goals. This coordination and outreach will also gather information on ISW facilities (existing and planned) in the adjacent subbasins which will assist in the design and locations of Delta-Mendota Subbasin (Subbasin) ISW facilities.

#### Task 1. Deliverables

- Technical memorandum summarizing the individual meetings and goals for future coordination

## Task 2. Acquire Access Agreements and/or Easements Needed for Well Installation

LSCE will work with Groundwater Sustainability Agencies (GSAs) and landowners within the individual Subbasin GSAs to acquire access agreements for well installation and future monitoring. LSCE will provide preliminary site locations for ISW wells to the GSA where the locations are specified. LSCE will assist the GSA in reaching out to landowners to obtain permission and use GSA-developed access agreements, if necessary, to allow for the drilling, installation, and monitoring of new ISW monitoring wells.

### TASK 2. ASSUMPTIONS

- Well sites will primarily be located on district-owned land

### Task 2. Deliverables

- Well installation and monitoring Access Agreements

## Task 3. Prepare Preliminary Design Plans

This task includes the development and finalization of ISW monitoring well locations and design based on the existing stream gages and monitoring sites along the San Joaquin River. LSCE will provide monitoring well specifications based on local geologic conditions and site specific information that drilling contractors will need as part of subsequent drilling and installation of ISW monitoring wells. Specifications will include provisions for the mobilization, construction, development, and testing of each of the wells and will include provision for site specific constraints including disposal of drill cuttings and fluids, water supply for drilling, and permitting. 60% and 100% plans and design specification will be provided per the deliverables identified in the implementation grant. The 60% plans and specification will serve as the draft, and 100% plans and

specification will include any edits/comments from the Coordination Committee (CC).

The preliminary plans will also include a basis for design report which will describe justification for well location and anticipated screen interval.

### TASK 3. ASSUMPTIONS

- Design of up to 5 dual-completion monitoring wells
- Recommended stream gage sites do not include access agreements or specifications

### Task 3. Deliverables

- Map of final monitoring locations
- Propose additional stream gage sites (if necessary)
- 60% design plans and specifications
- 100% design plans and specifications
- Basis for design report

## Task 4. Meetings and Communication

LSCE will attend a minimum of two meetings with the CC and/or the Technical Working Group (TWG) either individual meetings with each group or a join session. LSCE will provide monthly updates at CC regular monthly meetings.

This task will also include individual meetings with GSAs where monitoring wells are to be located and meetings with each adjacent subbasin along the San Joaquin River.

### TASK 4. ASSUMPTIONS

- Monthly updates provided at CC regular monthly meetings
- GSA/Subbasin meetings held via Zoom

### Task 4. Deliverables

- Two meetings with the CC and/or TWG
- Monthly updates to CC
- One to five Delta-Mendota GSA meetings
- Adjacent subbasin GSA meetings

Section 5.

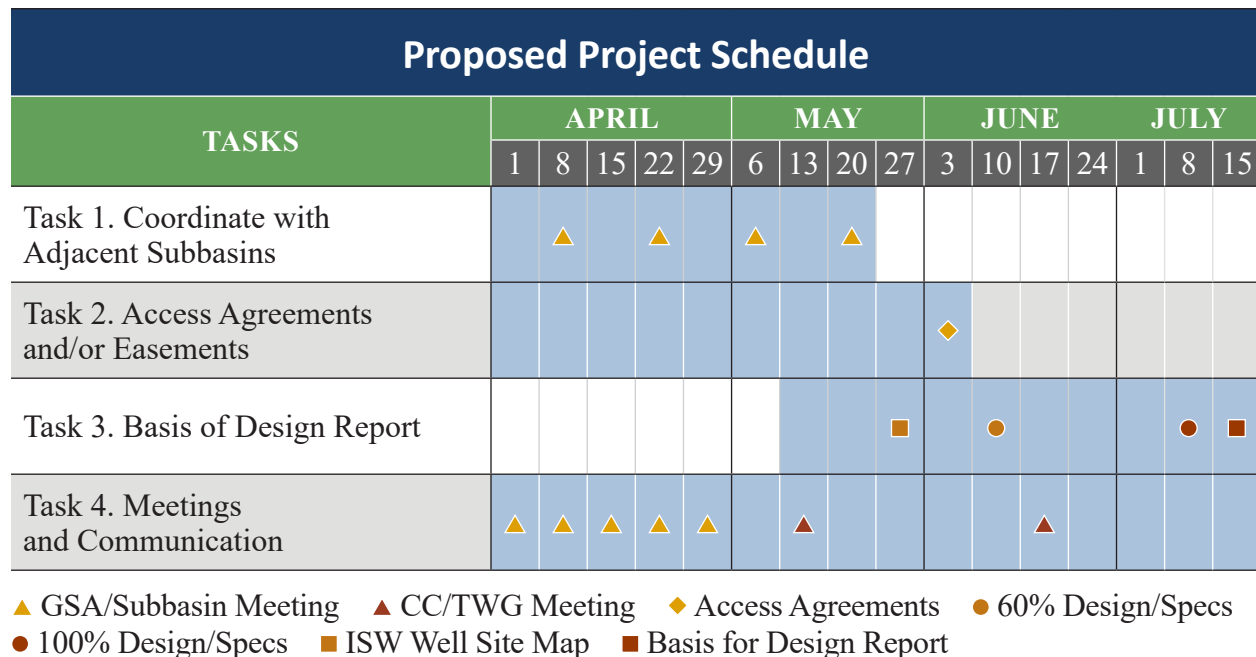

# Project Budget and Schedule

Estimated Project Budget		
Tasks	Level of Effort (hours)	Estimated Budget (dollars)
Task 1. Coordinate with Adjacent Subbasins	28	\$5,360
Task 2. Access Agreements and/or Easements	10	\$1,850
Task 3. Basis of Design Report	70	\$13,400
Task 4. Meetings and Communication	22	\$4,640
<b>Total Project Hours and Cost</b>	<b>130</b>	<b>\$25,250</b>

## Assumptions

Assumptions for each task are included in the Scope of Work where applicable and summarized below.

- Well sites will primarily be located on district-owned land
- Design of up to 5 monitoring well sites
- Recommended stream gage sites do not include access agreements or specifications
- Two meetings with the CC and/or TWG
- Adjacent subbasin meetings held via Zoom
- Up to five meetings with Delta-Mendota GSAs via Zoom
- Monthly updates can be provided at CC Regular Monthly Meetings
- A geotechnical investigation report not included

## 2023 SCHEDULE OF FEES ENGINEERING AND RELATED FIELD SERVICES

### Professional\*

Senior Principal .....	\$247/hr.
Principal Professional.....	\$236/hr.
Supervising Professional .....	\$228/hr.
Senior Professional .....	\$190 to 210/hr.
Project Professional .....	\$165 to 175/hr.
Staff Professional .....	\$145 to 160/hr.

### Technical

Engineering Inspector .....	\$145/hr.
ACAD DMS/GIS.....	\$145/hr.
Engineering Assistant.....	\$120 to 145/hr.
Scientist.....	\$120 to 145/hr.
Technician.....	\$120 to 145/hr.

### Project Admin Support

Word Processing, Clerical.....	\$94/hr.
Digital Communications Specialist.....	\$105/hr.
Project Admin/Accounting Assistant .....	\$110/hr.

Vehicle Use	\$0.655/mi(or curr. IRS rate)
Subsistence	Cost Plus 15%
Groundwater Sampling Equipment (Includes Operator)	\$170.00/hr
Copies	\$0.20 ea.
Professional or Technical Testimony	200% of Regular Rates
Technical Overtime (if required)	150% of Regular Rates
Outside Services/Rentals	Cost Plus 15%
Services by Associate Firms	Cost Plus 15%

\* Engineer, Geologist, Hydrogeologist, and Hydrologist

Section 6.

## Conflicts

LSCE’s proposed project manager, Will Halligan, is on the Coordination Committee and would recuse himself from discussion and voting related to awarding of the contract for this project. LSCE does not have any other actual, apparent, direct, indirect, or potential conflicts of interest with respect to our firm, management, or employees pursuant to this RFP.

Section 7.

## Professional Services Agreement and Insurance

LSCE has reviewed the San Luis & Delta-Mendota Water Authority (SLDMWA) Professional Services Agreement and has no exceptions or requested revisions to the agreement. LSCE insurance coverage meets or exceeds the SLDMWA insurance requirements as illustrated in the table below.

Insurance Coverage	Meets	Exceeds
Worker’s Compensation	■	
Employer’s Liability	■	
Commercial General Liability	■	
Commercial Automotive Liability	■	
Professional Liability (E&O)		■
Umbrella/Excess Liability		■

## WHY LSCE?

A **proven team** of water resources professionals dedicated to projects throughout California

An **industry leader** in planning, permitting, and engineering design, **designing hundreds of wells and water systems** up and down the state of California

**High value solutions** that limit capital expenditures and helps our clients address a broad range of water related challenges

Creative insight and **innovative responses** to perplexing challenges, and sound technical knowledge to support practical engineered solutions are integral to our practice

Will has over thirty years of professional experience including over 25 years in groundwater consulting with Luhdorff and Scalmanini Consulting Engineers (LSCE). Will currently conducts and manages a variety of groundwater investigation, management and development projects including groundwater resource and conjunctive use programs along with groundwater sustainability plan (GSP), recharge and seepage projects. His experience includes development and peer review of complex transient groundwater flow and solute transport models, evaluation, and assessment of geologic and hydrologic conditions for groundwater resource management, monitoring programs on local to regional scales, impacts analysis for CEQA and NEPA studies, investigation and identification of overdraft conditions, and development of groundwater management programs for sustainable groundwater development.

Will was involved in Sustainable Groundwater Management Act (SGMA) GSP regulation development as part of Groundwater Resources Association's Sustainable Groundwater Management Committee. From that work, he advises Groundwater Sustainability Agencies (GSAs) on GSP development and implementation. He also teaches groundwater resources related classes for University of California Extension program with a focus on groundwater management and development, SGMA, and GSP development and implementation.

## EXPERIENCE

### Groundwater Management and Development

Will has conducted investigations involving conjunctive use of surface and groundwater resources, water transfers, sustainable groundwater management and development, sustainable basin yield estimates to avoid overdraft conditions and impacts analysis of planned groundwater development and aggregate mining projects throughout many of the subbasins and basins listed below. Experience includes evaluation and feasibility of groundwater recharge projects such as surface recharge ponds, aquifer storage and recovery (ASR) projects and the influence of these projects on groundwater storage and quality. Will has also conducted investigations evaluating the impact of multiple management actions and projects on regional and groundwater conditions.

### REPRESENTATIVE PROJECT

**Technical Consultant for Mendota Pool Group Exchange Program:** Will oversees the monitoring and reporting of groundwater levels, quality, subsidence, pumping, and surface water quality for the Mendota Pool Groups exchange contract with the Bureau of Reclamation and

the Settlement Agreement with the San Joaquin River Exchange Contractors and Wonderful Orchards. Work also involved the technical analysis of the exchange programs impacts on ground and surface water conditions as utilizing a numerical flow model and a surface water mixing model as part of a CEQA and NEPA analysis of project impacts. Work also includes assisting the MPG in coordination efforts with area landowners and water districts in the management and use of the Mendota Pool.

## Groundwater Resource Investigations and Monitoring

Will has conducted numerous investigations of geologic and groundwater conditions utilizing existing and new monitoring and other hydrogeologic data to develop conceptual models, evaluate surface and groundwater interactions involving both flow and water quality, safe yield estimates, and evaluation of groundwater overdraft conditions in many areas of California including coastal and adjudicated basins. Groundwater resource investigations have also involved participation in projects that include legal proceedings that contest overdraft conditions, safe yield, and basin adjudication. Projects have also included development of monitoring programs involving well selection criteria and integration of conceptual model information to ensure that comprehensive data collection of multi-aquifer groundwater systems are adequately addressed.

### REPRESENTATIVE PROJECT

**Project Manager for Westlands Water District SGMA-Related Projects:** Will oversaw the development of a basin-wide conceptual model of geologic and hydrogeologic conditions of the Westside Subbasin. The project work included development and analysis of water budget components, impacts of subsidence on critical infrastructure, GSP development and implementation, and intra-basin and inter-basin coordination efforts and stakeholder outreach. Will is also involved in ongoing refinement of monitoring efforts for SGMA compliance and improvements to the conceptual model based on an expansion of data collection efforts by Westlands Water District.

## Groundwater Modeling

Will has developed, constructed, or critically reviewed analytical and numerical groundwater flow models along with solute transport models throughout California, including almost half of the Critically Overdrafted Basins

identified by DWR (as of August 2015). Many of the modeling projects integrate land use along with surface water and groundwater interactions to fully capture the effect land surface and near surface processes have on the groundwater system. Will's experience has also included peer reviews of both regional and local numerical and solute transport and seawater intrusion models throughout California, including coastal and inland basins and valleys. Locations include the counties and basins listed below:

### REPRESENTATIVE PROJECT

**Project Manager for Fresno County Management Area A and B GSAs:** Will led the LSCE effort to develop a numerical and solute transport model of the Fresno County portion of the Delta Mendota Subbasin. A comprehensive conceptual model of the groundwater and surface water conditions in the GSA was developed which led to the development and calibration of the transient model to long term average annual hydrologic conditions. This modeling effort supported the development of a GSP as part of a coordination agreement among the 23 GSAs in the Subbasin.

## Seepage and Recharge

Will has directed several investigations of seepage or recharge between surface water bodies as and groundwater. These investigations have also evaluated quantities of streamflow losses attributed to groundwater pumping and the influences on groundwater levels and quality. In addition, Will has also managed projects that evaluated percolation rates of recharge basins, quantification of net recharge from recharge facilities by accounting for rainfall and evaporation, along with the evaluation of mounding that may occur from recharge operations and the impacts to percolation rates.

### REPRESENTATIVE PROJECT

**Project Manager for Mendota Pool Group 20-year Extension of Exchange Program EIS/EIR:** As part of the groundwater conditions impact analysis development of the from the proposed project and project alternatives to support the development and preparation of environmental documents, Will managed the analysis of streamflow losses from the San Joaquin River from the project. The analyses included the evaluation of changes in streamflow and evaluation of shallow and deep groundwater levels from shallow and deep monitoring wells located adjacent to the San Joaquin River. The objective of the evaluation was to determine any cause

and effect on streamflow from project operations from the evaluation of streamflow changes and the change in groundwater levels at different depth horizons. This work included outreach and interaction with stakeholders including the Bureau of Reclamation and departments that manage the San Joaquin River Restoration Project.

## Well Design

Has assisted in the design and construction of groundwater monitoring and supply wells, conducted well interference analysis, capture zone analysis, aquifer test analysis, spinner test analysis, monitoring well network design, and source water protection program documents for CDPH supply well permit packages.

## REPRESENTATIVE PROJECT

### Project Manager for East Contra Costa Subbasin GSP

**Implementation:** Conducted an evaluation of potential sites for locating shallow monitoring wells for monitoring of potential interconnected surface water. Initial phase of work involved the design and construction of two shallow monitoring wells in two areas of the Subbasin identified as having groundwater dependent ecosystems and flowing streams. Subsequent phase of work will involve the design of deeper monitoring wells at the same two sites in order to monitor the response of groundwater levels and surface water flows to groundwater pumping patterns.

## Environmental Analysis

Has conducted groundwater studies for project impact analysis under CEQA and NEPA. Projects include conjunctive use, aggregate mining, groundwater development, mitigation of seawater intrusion, and water transfers and exchanges. Has also prepared and reviewed monitoring and mitigation plans as part of environmental analysis documentation. Experience includes analysis of surface water and groundwater

quality impacts on beneficial uses such as agriculture, municipal and domestic, and environmental purposes.

**Counties:** Fresno, Madera, Stanislaus, Kern, San Francisco, San Mateo, Monterey, San Diego, Sacramento, Santa Cruz, San Luis Obispo, Los Angeles, Butte, Inyo, San Bernardino, Santa Barbara, Napa, Tulare, Yolo, and Placer.

**Basins/Subbasins:** Delta-Mendota, Westside, and Tulare Lake Subbasins, Napa Valley, West-side (San Francisco/San Mateo County), Soquel Valley, Pajaro Valley, Salinas Valley (including 180/400 Foot Aquifer, East Side Aquifer, Forebay Aquifer, Upper Valley Aquifer, Paso Robles Area, Seaside Area, Corral de Tierra Area), Santa Maria River Valley, Santa Ynez River Valley, Santa Clara River Valley, Upper Santa Ana Valley, Mission Valley, San Diego River Valley, West Butte, Yolo, South American, Modesto, Turlock, Kaweah, Kings, Kern County, Antelope Valley, Rose Valley, Fenner Valley, Cadiz Valley, and Bristol Valley.

Andrew has six years of professional experience in groundwater consulting working on projects in California, Idaho, Oregon, and Utah. His expertise is in hydrogeological conceptualization. He has worked on multiple projects providing well design and construction oversight. Andrew is also well versed in GIS including geospatial analysis, mapping, and managing large geospatial datasets. He has worked in a variety of geologic settings including alluvial basins, volcanics, and bedrock terrains. A majority of his experience has been related to the development and implementation of Groundwater Sustainability Plans (GSPs) throughout California. This has included characterization of geologic and groundwater conditions, technical writing, and technical advisory committee participation.

## EXPERIENCE

### HYDROGEOLOGIC CONCEPTUALIZATION (CA)

**Delta-Mendota Groundwater Sustainability Plans, Fresno County, CA:** *Hydrogeologist/Project Hydrogeologist.* In order to comply with the Sustainable Groundwater Management Act (SGMA), many groundwater subbasin throughout California including the Delta-Mendota were required to develop a GSP. The Delta-Mendota Subbasin is comprised of six individual GSP's, two of which were prepared by LSCE (Farmers Water District and Fresno County). Andrew was lead on the developing the hydrogeological conceptual models, designing monitoring networks, and setting minimum thresholds and measurable objectives for the various groundwater sustainability indicators. He also was an active participant in the coordination meetings with the other Delta-Mendota GSP groups.

Andrew has also been involved with preparing annual reports for Farmers Water District and Fresno County.

**Tehama County Groundwater Sustainability Plans:** *Hydrogeologist.* Assisted with the development of four GSPs in Tehama County, CA. Analyzed shallow groundwater conditions for the identification of groundwater dependent ecosystems. This included utilizing publicly available database for well construction and water level data.

**Westside (Westlands) Subbasin Groundwater Sustainability Plan, Fresno County, CA:** *Hydrogeologist.* Assisted with the development of the Westside Subbasin GSP. Developed water level contours and storage change calculations for GSP annual reports.

### **Santa Clara River Valley Subbasin Groundwater Sustainability Plan, Los Angeles County, CA:**

*Hydrogeologist.* Prepared groundwater conditions section for the Santa Clara River Valley Subbasin GSP. Presented (Zoom) at public workshops to interested stakeholders.

### **Indian Wells Valley GSP Support, Ridgecrest, CA:**

*Hydrogeologist.* Prepared technical memoranda on hydrogeologic conditions in the Indian Wells Valley Subbasin.

### **Mendota Pool Group Transfer Program, Fresno County, CA:**

*Hydrogeologist.* Assisted with the preparation of annual reports on groundwater and surface water conditions in the Mendota, California. Planned and conducted groundwater quality sampling events.

### **Ryer Island Drawdown Assessment, Solano County, CA:**

*Project Hydrogeologist.* Performed analytical drawdown analysis for planned vineyard. Determined approximate pumping rate to drawdown water table below root zone.

### **Santa Clarita Water Agency (Formerly Castaic Lake Water Agency) Annual Water Supply Reporting, Santa Clarita, CA:**

*Hydrogeologist.* Assisted with the preparation of annual water supply reports. Created water level contour maps, hydrographs, and evaluated groundwater quality data.

## **HYDROGEOLOGIC CONCEPTUALIZATION (ID, OR, UT)**

### **Groundwater Baseline Report, Malheur County, OR:**

*Project Hydrogeologist.* Provided revisions for Groundwater Baseline Report. Addressed comments provided by the Bureau of Land Management (BLM) and Oregon Department of Geology and Mineral Industries (DOGAMI). Presented revision to report to BLM and DOGAMI.

### **Idaho Landfill Well Siting, Adams County: Project**

*Hydrogeologist.* Conducted a site visit and reviewed available geologic data to determine locations for monitoring wells. Prepared a technical memorandum providing well locations and rationale for those future well sites.

### **New Subdivision Groundwater Use/Drawdown Assessments, Various sites in Idaho: Project**

*Hydrogeologist.* Conducted multiple drawdown analysis for new subdivision throughout Idaho. Determined the impact of new domestic wells on existing groundwater

conditions. Attended zoning hearings and community meetings to discuss the results of drawdown assessments.

### **Irrigation Well Testing, Rich County, UT: Project**

*Hydrogeologist.* Performed pumping testing monitoring flow rate and water levels to determine well capacity. Reviewed available geologic information and made recommendation for new well location. Prepared memo documenting well testing and proposed well locations.

### **Hart Mountain National Antelope Refuge Downhole**

**Video Log and Well Reconnaissance, Plush OR:** *Project Hydrogeologist.* Performed downhole video log on existing well and provided recommendation for new well location

## **WELL DESIGN/OVERSIGHT**

### **City of Lathrop ASR Feasibility Study – Monitoring**

**Well Permitting and Design, Lathrop, CA:** *Project Hydrogeologist.* Prepared permits and provided specifications for monitoring well design as a part of an aquifer storage and recovery project.

### **City of Meridian Municipal Supply Well, Meridian,**

**ID:** *Project Hydrogeologist.* Provided oversight for well construction and well testing and prepared well completion report for City of Meridian public supply well.

### **City of Kuna Test Well and Municipal Supply Well,**

**Kuna, ID:** *Project Hydrogeologist.* Provide well design, construction and testing oversight, and prepared well completion report for test and a public supply well for the City of Kuna.

### **Buckeye Farms Irrigation Wells, Hagerman, ID:**

*Project Hydrogeologist.* Provided construction and well testing oversight for two large irrigation well (~8-10 CFS).

### **City of Boise Well Park Well Cleaning, Boise, ID:**

*Project Hydrogeologist.* Performed downhole video survey, developed specification, and oversaw well cleaning for park well that lost production due to clogged screens. Methods included bailing, swabbing, packer pumping, and chemical cleaning.

### **Pre-Engineering Report for Crouch Community Church,**

**Crouch, ID:** *Project Hydrogeologist.* Conducted site visit, pumping test, and prepared preliminary engineering report for previously constructed public supply well confirming all regulatory requirements were met.

**Pre-Engineering Report for Oregon Military Department, Boardman, OR:** *Project Hydrogeologist.*

Conducted site visit, pumping test, and prepared preliminary engineering report for previously constructed public supply well confirming all regulatory requirements were met.

**Pre-Engineering Report for Idaho Power Fish Hatcher, Wendell, ID:** *Project Hydrogeologist.* Conducted site visit and prepared preliminary engineering report for planned public supply well.

## GIS

**Boise River (Barber Pool) Bathymetry Mapping, Boise ID:** *Project Hydrogeologist.* Bathymetry mapping of the Boise River utilizing LIDAR data from the Idaho Lidar Consortium.

Figure 1. Schedule for Delta-Mendota Subbasin Response to DWR Inadequate Determination

Legend:

-  Draft Section/Chapter Deliverable
-  Final Section/Chapter Deliverable
-  Requested Item from GSP Groups
-  Meeting presenting technical information; feedback needed within 1 week after meeting

Notes:

(1) Meetings under Task 1 are identified by their meeting number, corresponding to the meeting list on Table 1.

Timeline: 2025 Plan Update for Northern and Central GSA

- December 14, 2022: Finalize recommended changes to draft 2025 Update timeline. Initiate task/subtask discussions/assignments for individual GSAs and consultants. Request input on changes to the Coordination Agreement.
- December 14, 2022: Review preliminary budgets for funds 64 and 65. Review of items needed for Annual Report.
- January 26, 2023: Review statutory requirements for the 2025 Plan updates and DWR's latest Plan update recommendations. Staff submits draft of example "simplified language" (from Common Chapter) for possible adjustments to 2025 Plan update. Begin discussions on how to address public comments received on GSP and revisions in the 2025 Plan Updates. Review of any released DWR GSP Determinations on other Subbasins for possible relevance to D-M Subbasin.
- February 23, 2023: Review of any released DWR GSP Determinations on other Subbasins for possible relevance to D-M Subbasin. Begin review of Annual Report Data for the 2025 Plan Updates.
- March 23, 2023: Conduct expedited review of DWR comments and recommended actions on revised GSPs and Common Chapter.
- April 27, 2023: Finalize review of DWR comments and recommended actions and incorporate into 2025 GSP update workplan. Finalize workplan including specific assignments for individual GSAs, GSP groups, and consultant tasks. Draft RFP for selecting Plan Update consultant. Schedule meeting with DWR to discuss Plan Update process and procedures.
- May 1, 2023: Issue RFP for Northern & Central Delta-Mendota Subbasin GSP 2025 Update. Staff/GSA/group analysis of "Basin" and "Setting" Chapters and DWR recommended actions. Further review of staff "simplified" text approach. Solicit feedback from DWR on simplified approach.
- May 31, 2023: Deadline for 2025 Update RFP Responses from Consultants. Continue discussions on Coordination Agreement revisions.
- June 1-15 2023: Subcommittee meets to select consultant(s) to interview for 2025 NCDMS Plan Update. Interview consultant(s) for 2025 NCDM GSP Update.

- June 22, 2023: Select consultant to perform specific tasks for 2025 NCDM GSP Update. Execute Fiscal Year task order. Consultant performs analysis of (any) DWR Plan Update guidance documents, recommended actions, and task/subtask lists and assignments including responses to comments. If needed, schedule meeting with DWR staff to discuss Plan Update items. Begin outline of responses to “general comments.” Begin review and discussions of Subbasin Water Budget and Sustainable Yield with Coordination Committee/TWG. Review of staff “simplified language” proposed changes. Review GSA/GSP group, staff, and consultant task list and timelines.
- July 27, 2023: Continue Water Budget and Sustainable Yield discussions with CC/TWG. Address DWR recommended actions. Finalize WQ section if able and begin discussions on CC Interconnected Surface Water SMC and Table. Meet with DWR to discuss Update progress and proposed changes.
- August 24, 2023: Finish water budget and sustainable yield with CC/TWG and incorporate into NCDM GSP. Incorporate WQ SMC and Table (if not already done) and/or Interconnected Surface Water SMC and table (see above). If able, begin discussions on Chronic Lowering of Groundwater. Address DWR recommended actions.
- September 28, 2023: Finalize Interconnected Surface Water SMC and Table (if not already done) and/or Chronic Lowering of Groundwater SMC and Table. Review tasks lists for GSAs, GSP groups, staff, and consultants for schedule. Review and identify any new priorities for next fiscal year’s budget. Address DWR recommended actions. Meet with DWR to discuss Update progress and proposed changes. Review GSA/GSP group, staff, and consultant task list and timelines.
- October 26, 2023: Finalize Chronic Lowering of groundwater SMC and table. Begin discussions of Reduction in Groundwater Storage SMC and Table. Continue review of budget. Address DWR recommended actions. Review items needed for Annual Report.
- November 30, 2023: Continue discussions of Reduction in Storage SMC and Table. Approve next fiscal year’s budget. Continue to review simplified language efforts. Address DWR recommended actions (if needed). Meet with DWR to discuss Update progress and changes.
- December 14, 2023: Finalize Reduction in Storage SMC and Table. Begin discussions of SMC and Table for Subsidence. Address DWR recommended actions (if needed). Review staff edits for simplified language. Review GSA/GSP group, staff, and consultant task list and timelines.
- January 25, 2024: Continue discussions of SMC and Table for Subsidence.

February 22, 2024:	Finalize SMC and Table for Subsidence. Address DWR recommended actions (if needed). Meet with DWR to discuss Update progress and changes.
March 28, 2024:	Begin planning public meetings on 2025 update. Finalize action on DWR recommended actions (if needed). Create draft presentation on Update changes. Meet with DWR to discuss Update progress and changes.
April 25, 2024:	Buffer month for tying up loose ends. Possibly begin public meeting roadshow. Review simplified language changes and refine draft presentation. Review GSA/GSP group, staff, and consultant task list and timelines.
May 22, 2024:	Begin holding public meetings on 2025 GSP update in Cooperation with the Coordination Committee. Note attendance and comments. Final review of GSA/GSP group task assignments and completion.
June 27, 2024:	Continue public meetings. Finalize draft Coordination Agreement revisions. Continue GSP simplified language revisions. Meet with DWR to discuss Update progress and changes.
July 25, 2024:	Continue Public Meetings. Continue individual GSP revisions. Coordination agreement out for GSA/GSP approval.
August 22, 2024:	Deadline for final review of CC, GSPs, and response to comments. Continue public meetings.
September 26, 2024:	Final approval of GSP 2025 Update.
October 1, 2024:	Begin public notices, public hearings, and formal approval at GSA level for final 2025 Common Chapter and individual GSP updates.
January 23, 2025:	Submit 2025 GSP Updates including Common Chapter, other appendices, and Coordination Agreement.

Task	Activity	Related	GSP Deadline	GSP Reference <sup>(a)</sup>	Status as Reported in WY2021 Annual Report	Comments	Status of Activities <sup>(b)</sup>
<b>1</b>	<b>Update/refine monitoring network as new wells are constructed and well construction information is obtained</b>						
1a	Well Census and Inventory project	--	2025	--	Completed in February 2022	Reconciliation of Well Census and Inventory information with update to SGMA monitoring network remains to be done.	Additional changes to NCDM representative monitoring network (RMN) will be necessary as additional wells were removed from the RMN during 2022 sampling events.
1b	Video log 14 wells that are missing well construction information	--	2025	NCDM GSP Section 7.2.5.1.6	N/A	Identified as an optional task in Well Census and Inventory project scope but not performed.	--
1c	Determine if video-logged wells are appropriate to add to the [SGMA] monitoring network	1a	2025	CC Section 4.2.8; NCDM GSP Sections 5.3.8 and 7.2.5.1.6	N/A	--	--
<b>2</b>	<b>Establish ISW SMC as a rate or volume of surface water depletions</b>						
2a	Install five additional ICSW monitoring wells adjacent to the San Joaquin River	--	2025	CC Section 4.2.8; NCDM GSP Section 5.3.8	N/A	\$929,400 awarded to Subbasin in SGMA Round 1 Implementation Grant for data gap filling efforts, including installation of at least one (1) and up to four (4) ICSW monitoring wells in the NCDM region.	SGMA Round 1 Funding Agreement executed with DWR on 10/7/22. Consultant RFP issued, contracting in progress. Funding for additional ISW wells in NCDM was included in SGMA Round 2 Grant Application submitted on 12/16/22.
2b	Collect and analyze data from ICSW monitoring wells	2a	2030	CC Section 4.2.8; NCDM GSP Section 5.3.8	N/A	Limited data collection and analysis to date.	--
<b>3</b>	<b>GDE mapping</b>						
3a	Analyze locations of potential GDEs using recent groundwater elevation/depth contour mapping	--	2025	CC Section 4.2.8; NCDM GSP Section 5.3.8	N/A	Limited/no data collection and analysis to date.	--
<b>4</b>	<b>Re-evaluate land subsidence SMC considering new data and studies</b>						
4a	Collect and analyze subsidence data from 2020-2025 and identify where there are spatial data gaps	--	2025	CC Section 4.2.8	Ongoing, data collected WY2020 and 2021	Completed <i>Conceptual Master Plan for Subsidence Monitoring and Management for the Delta-Mendota Subbasin</i> in June 2022.	Two NCDM GSAs performed subsidence monitoring at end of 2022. USBR survey planned for Dec. 2023.
4b	Work with USBR to revise CVHM2 model to simulate interactions between groundwater extractions and land subsidence	--	2025	CC Section 5.4.4	N/A	Intermittent coordination meetings have occurred between SLDMWA, GSAs, and USBR.	Reviewed groundwater model with USBR & USGS on 12/12/2022. Model likely not available for release until later in 2023.
4c	Determine portion of subsidence caused by groundwater extraction within and outside the Subbasin at each RMS	4a, 4b	2025	NCDM GSP Section 6.3.5.3	N/A	\$929,400 awarded to Subbasin in SGMA Round 1 Implementation Grant for portion of data gap filling efforts, including subsidence monitoring.	SGMA Round 1 Funding Agreement executed with DWR on 10/7/22. Consultant RFP for subsidence monitoring in progress.
4d	Review and revise HCM to incorporate new subsidence data, including AEM survey and results from the subsidence study	4a, 4c	2025	CC Section 5.4.4; NCDM GSP Section 6.3.5.3	N/A	Limited/no analysis to date.	--
4e	Assess allowable land subsidence on a Subbasin and localized basis	4a, 4c, 4d	2025	CC Section 5.4.4; NCDM GSP Section 6.3.5.3	N/A	Limited/no analysis to date.	--
4f	Conduct an updated subsidence DMC Conveyance Capacity Analysis	--	2025	NCDM GSP Section 5.3.8	N/A	SLDMWA led effort. SLDMWA noted that work has been done to create a model in HEC-RAS and an EIR for Subsidence Correction Project is expected to be complete mid-2023.	--

**Table 1: Northern & Central Delta-Mendota GSP Implementation Commitments - in Text of Groundwater Sustainability Plan**

Task	Activity	Related	GSP Deadline	GSP Reference <sup>(a)</sup>	Status as Reported in WY2021 Annual Report	Comments	Status of Activities <sup>(b)</sup>
<b>5</b>	<b>Refine/update water budget and sustainable yield estimates</b>						
5a	Establish additional CIMIS and/or other weather stations to define spatial variability of precipitation and evapotranspiration	--	2025	NCDM GSP Section 5.3.8	N/A	Limited/no analysis to date.	--
5b	Reconciliation of water budget nomenclature in individual GSPs with terminology used in the Common Chapter	--	2025	CC Section 4.3.1	N/A	Limited/no analysis to date.	--
5c	Improve estimated allocation of groundwater extraction between two aquifers (based on well construction information and inventory projects completed by GSAs in 2022)	1a, 1b	2025	CC Section 4.3.1	N/A	Limited/no analysis to date. Reconciliation of Well Census and Inventory information with update to pumping estimates remains to be done. Some GSAs have initiated efforts to register wells and require metering/water use reporting, but incomplete records to date.	--
5d	Improve storage estimates of each aquifer using data collected from 2020-2025	--	2025	CC Section 4.3.1	N/A	Limited/no analysis to date.	--
<b>6</b>	<b>Update Sustainable Management Criteria</b>						
6a	Develop short-term (acute) thresholds for Chronic Lowering of Groundwater Levels	--	2025	CC Section 5.4.1; NCDM GSP Section 6.3.1.2	N/A	Limited/no analysis to date.	--

**Notes:**

- (a) Commitments identified in this table were made in either the 2022 Amended NCDM GSP or Common Chapter for the Delta-Mendota Subbasin GSPs.
- (b) Based upon information communicated by GSAs.
- (c) A yellow highlighted row indicates that the activity was not included in the 2020 GSP submittal and was added during the 2022 GSP revision process.

**Table 2: Northern & Central Delta-Mendota GSP Implementation Commitments - Projects**

Tier <sup>(a)</sup>	Project <sup>(b)</sup>	Project Proponent	Implementation Start Date	Estimated Cost	Status as Reported in WY2021 Annual Report <sup>(c)</sup>	Comments <sup>(d)</sup>	Status of Activities <sup>(e)</sup>
1	Los Banos Creek Recharge and Recovery Project	San Luis Water District	February 2020	\$9,116,374	Preliminary design completed in 2018; additional steps pending funding for CEQA, design, and construction.	\$1,000,000 awarded in SGMA Round 1 Implementation Grant.	SGMA Round 1 Funding Agreement executed with DWR on 10/7/22.
1	Orestimba Creek Recharge and Recovery Project	Del Puerto Water District	February 2020	\$7,923,450	CEQA/NEPA complete; design anticipated complete in early Spring 2022; Construction anticipated complete by end of 2023.	--	Design complete in October 2022.
1	North Valley Regional Recycled Water Program (NVRWP) – Modesto and Early Turlock Years	Del Puerto Water District	February 2020	\$96,000,000	Completed Turlock and Modesto components in March 2020; Ceres component in progress, funding requested through SGMA Round 1 Implementation Grant; anticipated completion in 2023.	Portions of project are completed. \$250,150 awarded in SGMA Round 1 Implementation Grant.	SGMA Round 1 Funding Agreement executed with DWR on 10/7/22.
1	City of Patterson Percolation Ponds for Stormwater Capture and Recharge	City of Patterson	February 2020	\$7,800,000	Project still in conceptual and EIR phase (linked to planned development); preliminary design to occur in 2022.	--	Preliminary design initiated and in progress.
1	Kaljia Drainwater Reuse Project	San Luis Water District	February 2020	\$16,500,000	Preliminary design and CEQA/permitting in progress; design planned for 2023-2025, construction planned to start in 2025.	--	--
1	West Stanislaus Irrigation District Lateral 4-North Recapture and Recirculation Reservoir	West Stanislaus Irrigation District	February 2020	\$1,120,000	FS completed in Sept 2021; design anticipated to take 8 months with CEQA in parallel.	\$250,150 awarded in SGMA Round 1 Implementation Grant.	SGMA Round 1 Funding Agreement executed with DWR on 10/7/22. Construction planned to start in late 2024.
1	Revision to Tranquillity Irrigation District Lower Aquifer Pumping	Tranquillity Irrigation District	February 2020	\$0	Well Water Operations Plan established in 2017 and implemented on an annual basis.	--	--
2	Del Puerto Canyon Reservoir Project	Del Puerto Water District	January 2026	\$491,300,000	30% preliminary design anticipated to be complete in 2022; CEQA completed in October 2020; NEPA to be completed fall 2024; 100% design and permitting anticipated complete in 2024; construction anticipated complete in 2028.	--	--
2	Little Salado Creek Groundwater Recharge and Flood Control Basin	Stanislaus County	January 2026	\$7,710,000	Scheduled for development in subsequent phases of the overall CLIBP project.	--	--
2	Patterson Irrigation District Groundwater Bank and/or Flood MAR-type Project	Patterson Irrigation District	January 2026	TBD	Consultant retained for FS; acquired small potential property.	--	--
2	West Stanislaus Irrigation District Lateral 4-South Recapture and Recirculation Reservoir	West Stanislaus Irrigation District	January 2026	\$1,500,000	Preliminary design complete in September 2021.	Partially funded under IRWM grant.	--
2	Ortogonalita Creek Groundwater Recharge and Recovery Project	San Luis Water District	January 2026	TBD	N/A	Partially funded under IRWM grant.	Funding request was included in SGMA Round 2 Grant Application.

Abbreviations and Notes provided on page 2

**Table 2: Northern & Central Delta-Mendota GSP Implementation Commitments - Projects**

**Abbreviations:**

CEQA	= California Environmental Quality Act
CLIBP	= Crows Landing Industrial Business Park
EIR	= Environmental Impact Report
FS	= Feasibility Study
IRWM	= Integrated Regional Water Management
MAR	= Managed Aquifer Recharge
N/A	= Not Applicable
NCDM	= Northern & Central Delta-Mendota
NEPA	= National Environmental Policy Act
SGM	= Sustainable Groundwater Management
TBD	= To Be Determined
USBR	= United States Bureau of Reclamation
WY	= Water Year

**Notes:**

- (a) Projects and Management Actions divided into Tiers (pg 7-1 of Revised GSP):
- Tier 1 – Near-term projects and management actions that the Groundwater Sustainability Agencies (GSAs) are committed to implementing at this time. These projects and management actions are either currently in the process of being implemented or could be implemented in the near future (constructed and operational) within the next five years (by 2025).
- Tier 2 – Projects and management actions that have been identified and require further development before implementation can occur. It is anticipated that these projects and management actions could be developed over the next five years and implemented beginning in 2026 or later, pending re-evaluation prior to the 5-year GSP Update in 2025.
- Tier 3 – Longer-term projects and management actions that may be implemented in the future as needed. Many of these projects are outside of the GSAs' control but could have implications on surface water availability and/or are additional projects/management actions that could be implemented under an adaptive management approach. For purposes of this analysis, did not include the Tier 3 projects listed in the GSP (because implementation of the identified projects is driven by others).
- (b) Project information obtained from Section 7 of the 2022 amended NCDM GSP.
- (c) Consolidated WY 2021 Annual Report dated March 2022, incorporating updated information obtained from GSAs in 3Q2022 GSP Implementation Tracking Tools.
- (d) Per SGMA Budget Spending Plan circulated by John Brodie on 12 August 2022, NCDM was awarded a total of \$1,500,300 from SGMA Round 1 grant to Subbasin.
- (e) Based upon information communicated by GSAs.

**Table 3: Northern & Central Delta-Mendota GSP Implementation Commitments - Management Actions**

Tier <sup>(a)</sup>	Responsible GSAs	Status of Activities <sup>(d)</sup>	Status as Reported in WY2021 Annual Report <sup>(c)</sup>	Notes
<b>1</b>	<b>Lower Aquifer Pumping Rules for Minimizing Subsidence</b>			
	Central Delta-Mendota GSA	Developed draft administrative policy for well metering and reporting. Adopted policy in January 2023.	GSAs have coordinated on developing Lower Aquifer pumping rules. A few GSAs do not extract from Lower Aquifer.	Limited/no analysis or discussion to date. GSA efforts to require metering and reporting of pumping are continuing. This pumping data, coupled with the Well Census and Inventory Report, could be used to better understand the location and distribution of pumping.
	City of Patterson GSA			
	DM-II GSA	DPWD: developed draft groundwater well registration and metering policy.		
	Northwestern Delta Mendota GSA	Stanislaus & Merced County permits for new extraction wells require metering and reporting.		
	Oro Loma Water District GSA			
	Patterson Irrigation District GSA	Adopted ordinance requiring the registration of wells and reporting of pumping.		
	West Stanislaus Irrigation District GSA	Adopted ordinance requiring the registration of wells and reporting of pumping.		
	Widren Water District GSA	Two operational WWD Upper Aquifer (no Lower Aquifer) supply wells are equipped with meters.		
<b>1</b>	<b>Maximize Use of Other Water Supplies</b>			
	Central Delta-Mendota GSA	SNCWD: Signed partial agreement with USBR for CVP supply; additional USBR contracting planned.	N/A	No formal policies implemented.
	City of Patterson GSA	Evaluating stormwater recharge project (tied to development).		
	DM-II GSA	DPWD: developed draft Policy to maximize other water supplies.		
	Northwestern Delta Mendota GSA			
	Oro Loma Water District GSA			
	Patterson Irrigation District GSA	Surface water is preferred by local growers.		
	West Stanislaus Irrigation District GSA	Financial incentive for grower initial use of surface water.		
	Widren Water District GSA			
<b>1</b>	<b>Increasing GSA Access to and Input on Well Permits</b>			
	Central Delta-Mendota GSA	Merced updated its well permitting process.	GSAs have coordinated on increasing GSA participation in well permitting process.	Governor's EO N-7-22 regarding well permitting provides some clarity and authority. Merced County and Stanislaus County have updated their well permitting process and requirements.
	City of Patterson GSA			
	DM-II GSA			
	Northwestern Delta Mendota GSA	Merced updated its well permitting process. Stanislaus well permitting process being updated.		
	Oro Loma Water District GSA			
	Patterson Irrigation District GSA			
	West Stanislaus Irrigation District GSA			
	Widren Water District GSA			
<b>1</b>	<b>Drought Contingency Planning in Urban Areas</b>			
	City of Patterson GSA	Conducted contingency planning described in adopted 2020 UWMP.	Conducted as part of UWMP.	--
<b>1</b>	<b>Fill Data Gaps</b>			
	Central Delta-Mendota GSA		N/A	See "Implementation Activities" tab for specific data-gap filling efforts. SGMA Round 1 Implementation Grant awarded \$929,400 to Subbasin for Data Gaps and Monitoring. Issued RFP, with consultant contracting in progress. Additional ISW wells in NCDM included in SGMA Round 2 Grant Application submitted on 12/16/22.
	City of Patterson GSA	Conducted subsidence monitoring and added well to monitoring network. Improving well metering.		
	DM-II GSA	DPWD serving as grantee for SGMA Round 1 Implementation Grant.		
	Northwestern Delta Mendota GSA			
	Oro Loma Water District GSA			
	Patterson Irrigation District GSA	Improving pumping data collection. Lead for ISW component of SGMA Round 2 Grant Application.		
	West Stanislaus Irrigation District GSA			
	Widren Water District GSA

**Notes:**

- (a) Projects and Management Actions divided into Tiers (pg 7-1 of 2022 Amended NCDM GSP):
  - Tier 1 – Near-term projects and management actions that the Groundwater Sustainability Agencies (GSAs) are committed to implementing at this time. These projects and management actions are either currently in the process of being implemented or could be implemented in the near future (constructed and operational) within the next five years (by 2025).
  - Tier 2 – Projects and management actions that have been identified and require further development before implementation can occur. It is anticipated that these projects and management actions could be developed over the next five years and implemented beginning in 2026 or later, pending re-evaluation prior to the 5-year GSP Update in 2025.
  - Tier 3 – Longer-term projects and management actions that may be implemented in the future as needed. Many of these projects are outside of the GSAs’ control but could have implications on surface water availability and/or are additional projects/management actions that could be implemented under an adaptive management approach.
- (b) Management Action information obtained from Section 7 of the 2022 Amended NCDM GSP.
- (c) Consolidated WY 2021 Annual Report dated March 2022, incorporating information provided by GSAs in 3Q2022 GSP Implementation Tracking Tools. WY 2022 Annual Report is not yet available at time of table preparation and update.
- (d) Based upon information communicated by GSAs.

**Table 4: Northern & Central Delta Mendota GSP Implementation - Status of Well Ordinances**

Organization	Ordinance Identification	Ordinance Date	Text
Fresno County	Ordinance No. 00-13	September 2000	Section 14.03.090 - Conditions of permit approval. "C. If requested by the county, the permittee shall share with the county groundwater monitoring information and data, and, where practicable, the parties shall coordinate their groundwater management efforts to effectively monitor groundwater resources throughout the county"
Merced County	Ordinance No. 1930 An Ordinance to Prevent the Mining and Export of Groundwater from the Unincorporated Portions of Merced County	March 2015	Section 9.27.065 - Groundwater Monitoring & Reporting "A. Monitoring. All new permits for wells or groundwater exports under the scope of this ordinance shall be measured by a properly installed and maintained water measuring device satisfactory to the Department of Public Health, Division of Environmental Health. As an alternative to water measuring devices, other reasonable methods to determine groundwater extraction may be used if approved by the Department of Public Health, Division of Environmental Health. B. Reporting. All persons, including Public Works Agencies, that extract groundwater within the County shall cause to be prepared and submitted to the Department of Public Health, Division of Environmental Health, annual reports of groundwater information that are necessary to monitor the existing condition of groundwater resources within the County....The required information to be reported shall include without limitation water level and pumping data...."
Stanislaus County	Ordinance CS 1155, Section 9	2014	Section 9.37.065 - Groundwater Monitoring. "A. All persons, including public water agencies that extract groundwater within the county shall cause to be prepared and submitted to the county department of environmental resources periodic reports of groundwater information that are reasonably necessary to monitor the existing condition of groundwater resources within the county, to determine trends, or to develop effective sustainable groundwater management plans and policies. A de minimis extractor shall not be required to submit such information. B. The department shall develop and recommend regulations to be adopted by the board that establish the frequency and timing of required reports, and the required information to be monitored, including, without limitation, water level and pumping data, or other data necessary for any other method to determine groundwater production."
Patterson Irrigation District	Resolution 05-2020: Patterson Irrigation District Groundwater Sustainability Agency Rule Regarding Irrigation Well Meters	15 April 2020	"The owner of any Groundwater Extraction Facility within the PID GSA must register that Groundwater Extraction Facility with the PID GSA...  ...The owner of every Groundwater Extraction Facility within the PID GSA must measure use of that Groundwater Extraction Facility by a water-measuring device (Meter) satisfactory to the PID GSA...  ...Meters must be installed on all Groundwater Extraction Facilities by January 1st, 2021."
West Stanislaus Irrigation District	West Stanislaus Irrigation District Groundwater Sustainability Agency Policy Regarding Irrigation Well Meters	2020	"The owner of any Groundwater Extraction Facility within the WSID GSA must register that Groundwater Extraction Facility with the WSID GSA...  ...The owner of every Groundwater Extraction Facility within the WSID GSA must measure use of that Groundwater Extraction Facility by a water-measuring device (Meter) satisfactory to the WSID GSA. Meters must be installed on all Groundwater Extraction Facilities by January 1st, 2021. The meter shall measure all flow rate in gallons per minute, or cubic feet per second and totalize total extractions in gallons, cubic feet, or in acre-feet."

**Table 4: Northern & Central Delta Mendota GSP Implementation - Status of Well Ordinances**

Organization	Ordinance Identification	Ordinance Date	Text
Del Puerto Water District	Draft Groundwater Well Metering Policy	15 June 2022	Covers well registration, metering, access, costs, semi-annual reporting, maintenance, and exclusions. Packets to be sent to customers explaining the new well registration and metering policy requirements in the near future.
City of Patterson	Ordinance No. 348, Section 1	1981	13.20.010 Private wells - Construction prohibited. No person, firm or corporation may drill, dig or install a water well in the city for any purpose whatsoever, save and except the Patterson City Water Company.
Central Delta-Mendota GSA	Central GSA Resolution Nos. 2021-01 and 2021-02	25 January 2021	Adopted two Resolutions on 25 January 2021: require registration of all wells by 4/1/2021, impose fee for late registration. Developed draft Well Metering and Reporting Policy in 2022 to require installation of meters on production wells within the GSA and reporting of pumped groundwater volumes. Adopted Policy Number Two in January 2023.
Widren Water District	N/A	N/A	N/A. The two operational supply wells in WWD are equipped with meters.

**Abbreviations:**

- GSA = Groundwater Sustainability Agency
- GSP = Groundwater Sustainability Plan
- N/A = Not Applicable
- NCDM = Northern & Central Delta-Mendota
- No. = Number
- PID = Patterson Irrigation District
- SGMA = Sustainable Groundwater Management Act
- WSID = West Stanislaus Irrigation District

**Notes:**

- (a) Online search for ordinances adopted by NCDM GSAs and member agencies performed in August 2022.
- (b) Note that County Ordinances are also discussed in Section 2.3.2 of the 2022 Amended NCDM GSP. Discussion speaks more to permitting process for well construction/destruction and less to measuring of pumped groundwater.

EKI = EKI Environment & Water, Inc.	PD = Preliminary Design	TBD = to be determined	WSID = West Stanislaus Irrigation District
FS = Feasibility Study	PID = Patterson Irrigation District	TRID = Tranquillity Irrigation District	WY = Water Year
GSA = Groundwater Sustainability Agency	P&P = Provost & Pritchard	TWG = Technical Working Group	

**Notes**

- (a) Projects and Management Actions extend through 2025.
- (b) Portion of project is complete. Increased supply of recycled water expected.
- (c) Needs to be coordinated with Orestimba and Del Puerto Creek projects.
- (d) In operation starting in 2017.

**Key Dates**

March 21, 2023: Subbasin Coordination Committee Meeting  
 March 21, 2023: Northern & Central Delta-Mendota Management Committees Meeting  
**April 1, 2023: WY 2022 Consolidated Annual Report Due to DWR**  
 April 10, 2023: Subbasin Coordination Committee Meeting  
 April 27, 2023: Northern & Central Delta-Mendota Management Committees Meeting  
 May 8, 2023: Subbasin Coordination Committee Meeting  
 May 25, 2023: Northern & Central Delta-Mendota Management Committees Meeting

## Funding Opportunities – Updated 3/18/2023

### Multibenefit Land Repurposing Program

This program will fund groundwater sustainability projects that reduce groundwater use, repurpose irrigated agricultural land, and provide wildlife habitat. Funding is intended to increase regional capacity to repurpose agricultural land to reduce reliance on groundwater while providing community health, economic wellbeing, water supply, habitat, and climate benefits. Four regional block grants of up to \$8.9 million each to a total of \$40 million available in Round 2. Department of Conservation. Deadline 3/29/23

### Integrated Climate Adaptation and Resiliency Program Climate Adaptation Planning Grant

The program provides flexible funding to meet multi-sector/issue planning needs that intersect with climate risks, including but not limited to land use, transportation, housing, natural resource management, public infrastructure, and hazard mitigation issues. Funding from the Governor's Office of Planning and research. Maximum award ~\$650,000. Deadline 3/31/23

### County-Wide and Regional Funding Program

Funding for regional programs that address drought-related and contamination issues for small water systems and domestic wells serving DACs. No deadline. Funding is from the State Water Board.

### Restoration Grant Program

Multiple funding programs including wetland restoration, wildlife corridors, and addressing climate impacts. Project categories include: planning, implementation, acquisition, monitoring, and scientific studies. Applications accepted on rolling basis. Funding from CA Dept. of Fish and Wildlife.

### Riparian Habitat Conservation Program

The Wildlife Conservation Board is accepting concept proposals for projects that provide meaningful and sustainable improvements to riparian habitats. \$3 Million available on a rolling basis.

### Fertilizer Research and Education Program

Total of \$225,000 available for projects on: improving input management, understanding plant-soil processes, and evaluating loss pathways. They are focused on nutrients in general with nitrogen/nitrates as a particular focus. It is a rolling deadline with funding awarded as projects are approved. CA Dept. of Food and Agriculture.
