Flood Risk Management Life Cycle

Webinar Series: Preparation, Response, Recovery, Mitigation

The U.S. Army Corps of Engineers (USACE) and the California Department of Water Resources (DWR) have partnered under the Silver Jackets collaborative flood risk reduction program to host a series of four Watershed University webinars focusing on post-wildfire flood outreach and education as they relate to the four stages of the flood risk management life cycle: preparation, response, recovery, and mitigation.

Please join us for our first webinar:

PREPARATION: RISK MESSAGING

Do you work in floodplain management or are you a community official or decision-maker who's interested in learning more about how to better communicate risks? Join us for this free lunchtime webinar where we'll focus on the preparedness stage of the Flood Risk Management Life Cycle. We'll discuss bilingual risk messaging, showcase some templates, and have an opportunity for open discussion and questions.

Host: USACE and DWR

When: 25 April 2023 11:30-12:30 PM

Presenters: Patricia Fontanet Rodriguez, Natural Disaster Program Manager, USACE
Christian Erickson, Community Preparedness Officer, FEMA Region 9
Liz Bryson, Manager, Flood Operations Section, CA-DWR
