Items presented under public comment may not be discussed or acted upon by the Group at this time. For items appearing on the agenda, the public is invited to comment at the time the item is called for consideration by the Group. Any person addressing the Group under public comment will be limited to a 3-minute presentation to ensure that all interested parties have an opportunity to speak. Also, all persons addressing the Group must state their name and county of residence for the record.

Items of Interest (Jacob Roberson)

- The [Flood-Managed Aquifer Recharge \(Flood-MAR\) Network](#) has posted a summary of [November 2023's Flood-MAR Public Forum](#). During the forum, Flood-MAR practitioners shared their recent success stories. The discussions yielded 5 primary takeaways, including that California is poised to scale-up Flood-MAR as a multi-benefit water management strategy that leads to aquifer replenishment, flood risk reduction, and ecosystem enrichment.

The purpose of the Flood-MAR network is to improve water availability, flood risk reduction, and groundwater recharge to sustain communities and ecosystems through Flood-MAR implementation. The Flood-MAR network has 5 goals:

1. Substantially increase groundwater storage, improve flood management, and enhance riparian and groundwater-dependent habitat in California.
 2. Position the network as a credible resource when evaluating, planning, or implementing managed aquifer recharge projects.
 3. Promote opportunities for connections and partnerships to leverage and build upon other's work.
 4. Facilitate sharing of information that advances Flood-MAR implementation and promotes action.
 5. Provide support as meaningful work is pursued separately and together.
