

Approved Vendors For Meter Inspection Services

This list of County GSA approved vendors for meter installation inspection services is intended to provide access to third-party companies that are approved to perform installation inspections as required by the ETAW appeal process or meter pre-approval process. The Participant shall choose a flow meter inspector from the list of qualified entities and shall contract directly with the chosen entity and pay all necessary fees and charges for the services performed. The County GSA does not warrant, either expressly or impliedly, the services performed by the selected flowmeter inspector, but reserves the right to review the inspector's conclusions for purposes of the appeal. The Participant assumes any and all risks and liabilities associated with the work of the selected flowmeter inspector under any contract with the Participant, and County is not a third-party beneficiary under any such contract.
